01 PROFILE

Full-stack TypeScript developer who ships *complete products to production*, not mockups: two Shopify SaaS apps built solo, one of them live on the App Store, an e-learning platform and a React graphics editor. I own the architecture, code review, testing and deployment; an AI-agent workflow (Claude Code) speeds up the writing of code.

02 EXPERIENCE

Independent Full-Stack Developer

Jul 2025 - present

Nette (Shopify SaaS) & **Studio Œillet** · Guérande, France

- **Nette Profit Analytics**, live on the Shopify App Store since October 2026: shows a store's true net profit. TypeScript (React Router 7 SSR, Prisma, PostgreSQL 17, CI), 12 OAuth integrations (8 ad platforms, 4 carriers), a Claude assistant with Zod-typed tool use and cost caps.
- **Nette Factures**, in App Store review: compliance with France's 2026–27 e-invoicing mandate. Generates Factur-X invoices (PDF/A-3 + EN16931 XML), stores amounts as integer cents, keeps an immutable SHA-256 hash-chained archive locked by PostgreSQL triggers. Pure TypeScript domain core with no I/O; 260 Vitest test files.
- **Lettrink**, an in-browser manga translation editor (React 19): layered canvas, 27 tools, 46 shortcuts, synced undo/redo, real-time progress streamed over SSE from a FastAPI backend (OCR, translation, inpainting).
- **Ops**: hardened VPS (Docker, Caddy, encrypted Postgres and backups). LearnJS.eu: 14 FR/EN courses, Stripe, JWT verified at the edge with Web Crypto.
- **Late 2025**: levelled up on TypeScript and AI agents; designed Studio Œillet (Astro, Lighthouse mobile score 96).

Next.js Web Developer

Mar 2024 - Jun 2025

Génération Internet, web agency · Nantes, France

- **Dynabuy** (clubsdaffaires.fr): took a Next.js + TypeScript site from zero to production; built about 90% of the UI, turning Adobe XD designs into reusable React components.
- Migrated the whole codebase to TypeScript, wired it to the internal API, chose between SSR, SSG and CSR, and tuned Core Web Vitals.
- **Other clients**: built a premium car maker's Figma designs as components in a Symfony application; redesigned internal back-office screens.

Freelance Web Developer

Jan 2023 - Feb 2024

- Scoped client needs and wrote specs; built custom WordPress / WooCommerce themes and Shopify stores; handled SEO and client training.

Web Developer

Sep 2021 - Aug 2022

Flexy-Web

- Custom WordPress, WooCommerce and Shopify themes and plugins; e-commerce, SEO, performance and marketing integrations.

03 SKILLS

Front-end

TypeScript, React 18/19, Next.js (App Router), React Router 7 SSR, Tailwind CSS, Shopify Polaris, Astro, i18n

Back-end & data

Node.js, Prisma, PostgreSQL, Redis, pg-boss, GraphQL, REST, Zod, OAuth2, JWT, Stripe, FastAPI

Infra & quality

Docker, Caddy, Linux (VPS), GitHub Actions, Vitest, Playwright, Vercel, Netlify, Core Web Vitals, SEO

AI & tooling

Claude Code (agents), Anthropic SDK (tool use), Git, Figma, Adobe XD, Remotion
